Display	1024 x 768 resolution for PC, 1280 x 800 for Mac
Graphics	DirectX 10 graphics card for graphics hardware acceleration for PC

Can people with an earlier version of office open documents I created using Microsoft 365 or office 2021?

Microsoft 365, Office 2021, Office 2019, Office 2016, Office 2013, Office 2010, Office 2007, Office for Mac 2011, and Office for Mac 2008 applications can open your documents without any additional action. Customers using earlier versions of Office may need to download and install a compatibility pack.

What is the different between Microsoft 365 subscription plans and Office as a one-time purchase?

Microsoft 365 is a subscription that comes with premium apps like Word, Excel, PowerPoint, OneNote, Outlook, Publisher, and Access (Publisher and Access available on PC only). The apps can be installed on multiple devices, including PCs, Macs, iPads, iPhones, Android tablets, and Android phones. Microsoft 365 also comes with services like 1 TB of OneDrive storage, 60 Skype minutes per month, and Microsoft chat and phone support. With a subscription, you get the latest versions of the apps and automatically receive updates when they happen.

Office 2021 is a one-time purchase that comes with classic apps like Word, Excel, and PowerPoint for PC or Mac, and does not include any of the services that come with a Microsoft 365 subscription. One-time purchases don't have an upgrade option, which means if you plan to upgrade to the next major release, you'll have to buy it at full price.
